

STORM DRAIN TRACTOR

INSPECTION SYSTEM

This steerable four-wheel drive transporter is the perfect solution for inspecting storm drains, sewer, and water pipes 24 inches and larger. The powerful tractor can achieve speeds up to 70 feet per minute and supports up to 3,000 feet of Single Conductor cable. Its remote-controlled, motorized camera lift enables the camera to be centered in pipelines up to 60 inches in diameter. The Steerable Storm Drain Tractor is compatible with all Subsite's mainline cameras.

TrakSTAR Camera*

KEY FEATURES

- :: Supports all Subsite mainline cameras
- :: Remote controlled camera lift centers the camera in up to 60-inch pipes
- :: For pipelines 24 inches and larger
- :: Dual 26W (2600 lumens) adjustable LED light array
- :: Four-wheel drive with high-efficiency gear train
- :: Speeds up to 70 feet per minute
- :: Large 11-inch tires
- :: Freewheeling retrieval

STORM DRAIN TRACTOR INSPECTION SYSTEM SPECIFICATIONS

DIMENSIONS

Weight	100 lbs
Length	36 in.
Width	15 in.
Height	15.5 in.

PERFORMANCE

Pulling Force	70 lbs
Motor	Three speeds forward, three speeds reverse, freewheel, stop. Permanent magnet 90 VDC high torque
Drive/speed	Four wheel drive with capability of 80-85 feet per minute
Lighting	Dual 26W (2600 lumens) adjustable

FEATURES

Minimum access manhole	21 in. diameter
Minimum turning radius	36 in. (3 feet)
Optional	Color back-up camera / 13 in. tires

MORE INFORMATION

Pontoon & Sonar Solutions

Subsite's pontoon assembly is perfect for large line applications with uninterrupted water flow. It can be used with any of Subsite's mainline inspection cameras and also pairs well with our **Sonar Systems**. The unit collapses easily for manhole entry and extraction and is capable of handling heavy loads. The Subsite **Sonar Profiling System** includes an underwater scanning transducer, which may be mounted on a skid or flotation device, a sonar processor unit, and the Subsite Single Conductor interface components.

WHY CHOOSE US

PROVEN. Over 30 years building high-performance pipeline inspection systems.

SINGLE CONDUCTOR TECHNOLOGY. Delivers multi-function flexibility, great video quality, and power through a nearly indestructible steel-wrapped cable with an industry-leading, 5-year warranty.

DURABILITY. Our equipment is manufactured with CNC precision. It's built to last and is forward- and backward-compatible.

SERVICE. Tech support is a phone call away. If service is needed, we'll get you back up and running fast.

LOW COST OF OWNERSHIP. Compare our affordable systems and fairly priced, fast service with any competitor.

About Subsite[®]

Subsite provides electronic technology to support the installation, maintenance, inspection, and rehabilitation of underground pipe and cable. Our comprehensive suite of products includes utility locators, Horizontal Directional Drilling (HDD) guidance equipment, equipment machine controls, and closed-circuit television remote inspection and monitoring cameras and accessories.
