

THE CUBE

MOBILE PIPELINE INSPECTION SYSTEM

The Cube includes nearly everything our vans, highcubes, and other mobile systems offer in a portable, self-contained CCTV inspection work station. Load it on a trailer, set it in a truck bed or on the back of an ATV. It's ideal for accessing tight spaces and easements with our complete line of durable inspection technologies.

KEY FEATURES

- :: Mounts on trucks, ATVs, trailers
- :: Mainline system with 1,500 feet of cable
- :: Rack mount or laptop data collection
- :: Onboard generator
- :: Extreme-duty cable reel with automatic cable level wind with heavy-duty, self-aligning sealed bearings
- :: Front access, 9-gallon pressurized wash-down system
- :: MPEG video recording capability

Honda air-cooled, 2.0 KW, portable gasoline generator with built-in battery and fuel tank

EQUIPMENT

- Mainline Controller, Single Conductor, ETL Listed
- Auxiliary Handheld Controller with All Zoom Camera and Tractor Functions
- Compatible with All Major Data Collection Software
- CPU Laptop or Rack Mount
- Monitor, 19-Inch Flat Panel LCD/TFT
- Compact Portable Reel with Up to 1,500 Feet of Cable

WHY CHOOSE US

PROVEN. Over 30 years building high-performance pipeline inspection systems.

SINGLE CONDUCTOR TECHNOLOGY. Delivers multi-function flexibility, great video quality, and power through a nearly indestructible steel-wrapped cable with an industry-leading, 5-year warranty.

DURABILITY. Our equipment is manufactured with CNC precision. It's built to last and is forward- and backward-compatible.

SERVICE. Tech support is a phone call away. If service is needed, we'll get you back up and running fast.

LOW COST OF OWNERSHIP. Compare our affordable systems and fairly priced, fast service with any competitor.

About Subsite®

Subsite provides electronic technology to support the installation, maintenance, inspection, and rehabilitation of underground pipe and cable. Our comprehensive suite of products includes utility locators, Horizontal Directional Drilling (HDD) guidance equipment, equipment machine controls, and closed-circuit television remote inspection and monitoring cameras and accessories.
